◎ SIM STUDIO

150 interactive science simulations for WAEC and IGCSE classes

Help students see what's happening in physics, chemistry and biology. Move a slider and watch the science change.

Physics
Motion, energy, waves, electricity, magnetism, nuclear

Chemistry
Atoms, bonding, moles, acids, rates, electrolysis, organic

Biology
Cells, enzymes, body systems, genetics, evolution, ecology

- ✔ Organised by WAEC and IGCSE syllabus topics
- ✔ Runs on phones, laptops and projectors
- ✔ Live numbers and graphs
- ✔ Works offline: no internet needed
- ✔ "Try this" questions for every topic
- ✔ Free for teachers and students

How to use it in your next lesson

1. Open **sim-stud.netlify.app** and type your topic, e.g. "titration".
2. Press **Full screen** to show it on the projector.
3. Ask students to predict, then move the sliders to test their ideas.
4. No internet in the lab? Click **Download for offline use** and copy it to a USB stick.
